

# TOWER 5x80 SITAIR

Disinfection UV TOWER against germs and viruses for surfaces and air. Useful when an additional disinfection may be required.

Easy to use and to move. Completely made in stainless steel for a long life. Remote control and motion detector are standard features for personnel safety.

UVC lamps, with high germicidal power, are positioned to have excellent disinfection at 360 °. In addition, the lamps can also be oriented in different positions (0-180 °) in order to be effective wherever disinfection is required.

- Stainless steel structure
- 360° angle disinfection
- Strong wheels for transport
- Up to 50 m2 disinfection surface
- Disinfection time settable
- Schuko Plug – 10 meter cable
- Motion detector
- Remote control
